# **conditional Documentation**

***Release 1.5***

**Stefan H. Holek**

**Sep 14, 2023**

## **CONTENTS**

<b>1 API Documentation</b>	<b>3</b>
<b>2 Indices and Tables</b>	<b>5</b>
<b>Python Module Index</b>	<b>7</b>
<b>Index</b>	<b>9</b>

The `conditional` context manager comes handy when you always want to execute a with-block but only conditionally want to apply its context manager.

If you find yourself writing code like this:

```
if CONDITION:  
    with CONTEXTMANAGER():  
        BODY()  
else:  
    BODY()
```

Consider replacing it with:

```
with conditional(CONDITION, CONTEXTMANAGER()):  
    BODY()
```

The context manager ships with type annotations. Type checkers and IDEs can use this information to implement type safety and auto completion.

---

CHAPTER  
ONE

---

## API DOCUMENTATION

`conditional.conditional(condition, contextmanager)`

Wrap a context manager and enter it only if condition is true.

---

**CHAPTER  
TWO**

---

**INDICES AND TABLES**

- genindex
- modindex
- search

## PYTHON MODULE INDEX

### C

conditional, 1

# INDEX

## C

conditional  
    module, 1  
conditional() (*in module conditional*), 3

## M

module  
    conditional, 1
